

**THE Brooklyn Creek
Watershed Society
IVY LEAGUE PULLERS
are busy again this
season!**

WHY?

Ivy damages the bark of trees as it climbs and will eventually overtake even a mature tree, weakening branches through its weight and preventing light from penetrating leaves. Most importantly, our trees are an important carbon sinks from the atmosphere, our climate change heroes and this league is determined to keep them alive for the sake of our planetary health!

The ivy on the ground also crowds the native species and needs removal. The park is to remain "Natural", so leave the sticks, branches, leaves, logs where they are - work around them (or return the debris after pulling the ivy beneath).

WHEN? Saturday March 25th @ 9AM for the start of the Ivy Pull Season.

WHERE? Meet at Cedar bridge: (as you go North on Pritchard, turn right on Cedar Avenue)
<https://goo.gl/maps/mbhNz18nZEvRdr157>

WHAT?

- Bring your own gardening/work gloves and dress for the weather
- Sturdy footwear/rubber boots
- Long Pants - waterproof works well, especially for this time of year
- Water & snacks
- Protective glasses (optional)
- We have tools, tarps, fun and lots of interesting people for you to meet!
- There will be a short orientation at the beginning for those new to this.

Should you have any questions, please let us know.

**WORKING IN PARTNERSHIP WITH FELLOW PARTNERS TO KEEP THE NATURE IN OUR
BROOKLYN CREEK NATURE PARKS**
